

The image shows a wireframe for the SplitBill website. The main landing page has a header with the "SplitBill" logo and "Login" and "Signup" buttons. Below the header is a section for a "Tagline/Explanation of product" and a large placeholder for an "Image of product/ or user testimonial?". At the bottom of the main page is a "Try it out! (Guest login)" button. A login modal is shown below the main page, containing "Username" and "Password" input fields and a "Login" button. Arrows indicate that the "Try it out! (Guest login)" button on the main page opens the login modal, and the "Login" button in the modal is linked to the "Login" button in the main header.
